

Anatomy of Nervous system(NS)

Asmaa Ibrahim Ahmed
Professor Of Anatomy
And Embryology
Ain Shams University

The Female genital organs

- 1.the 2 ovaries
- 2.The uterine (Fallopian) tubes
3. The uterus
4. *cervix*
- 5 . Vagina
- 6 . vulva

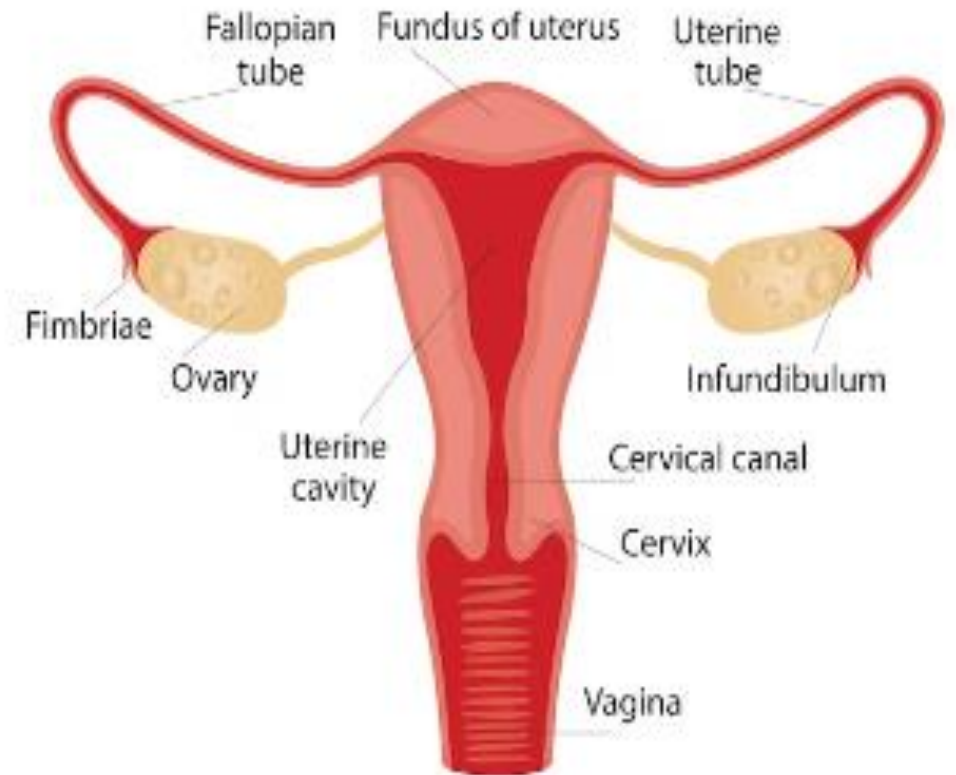

The Female genital organs

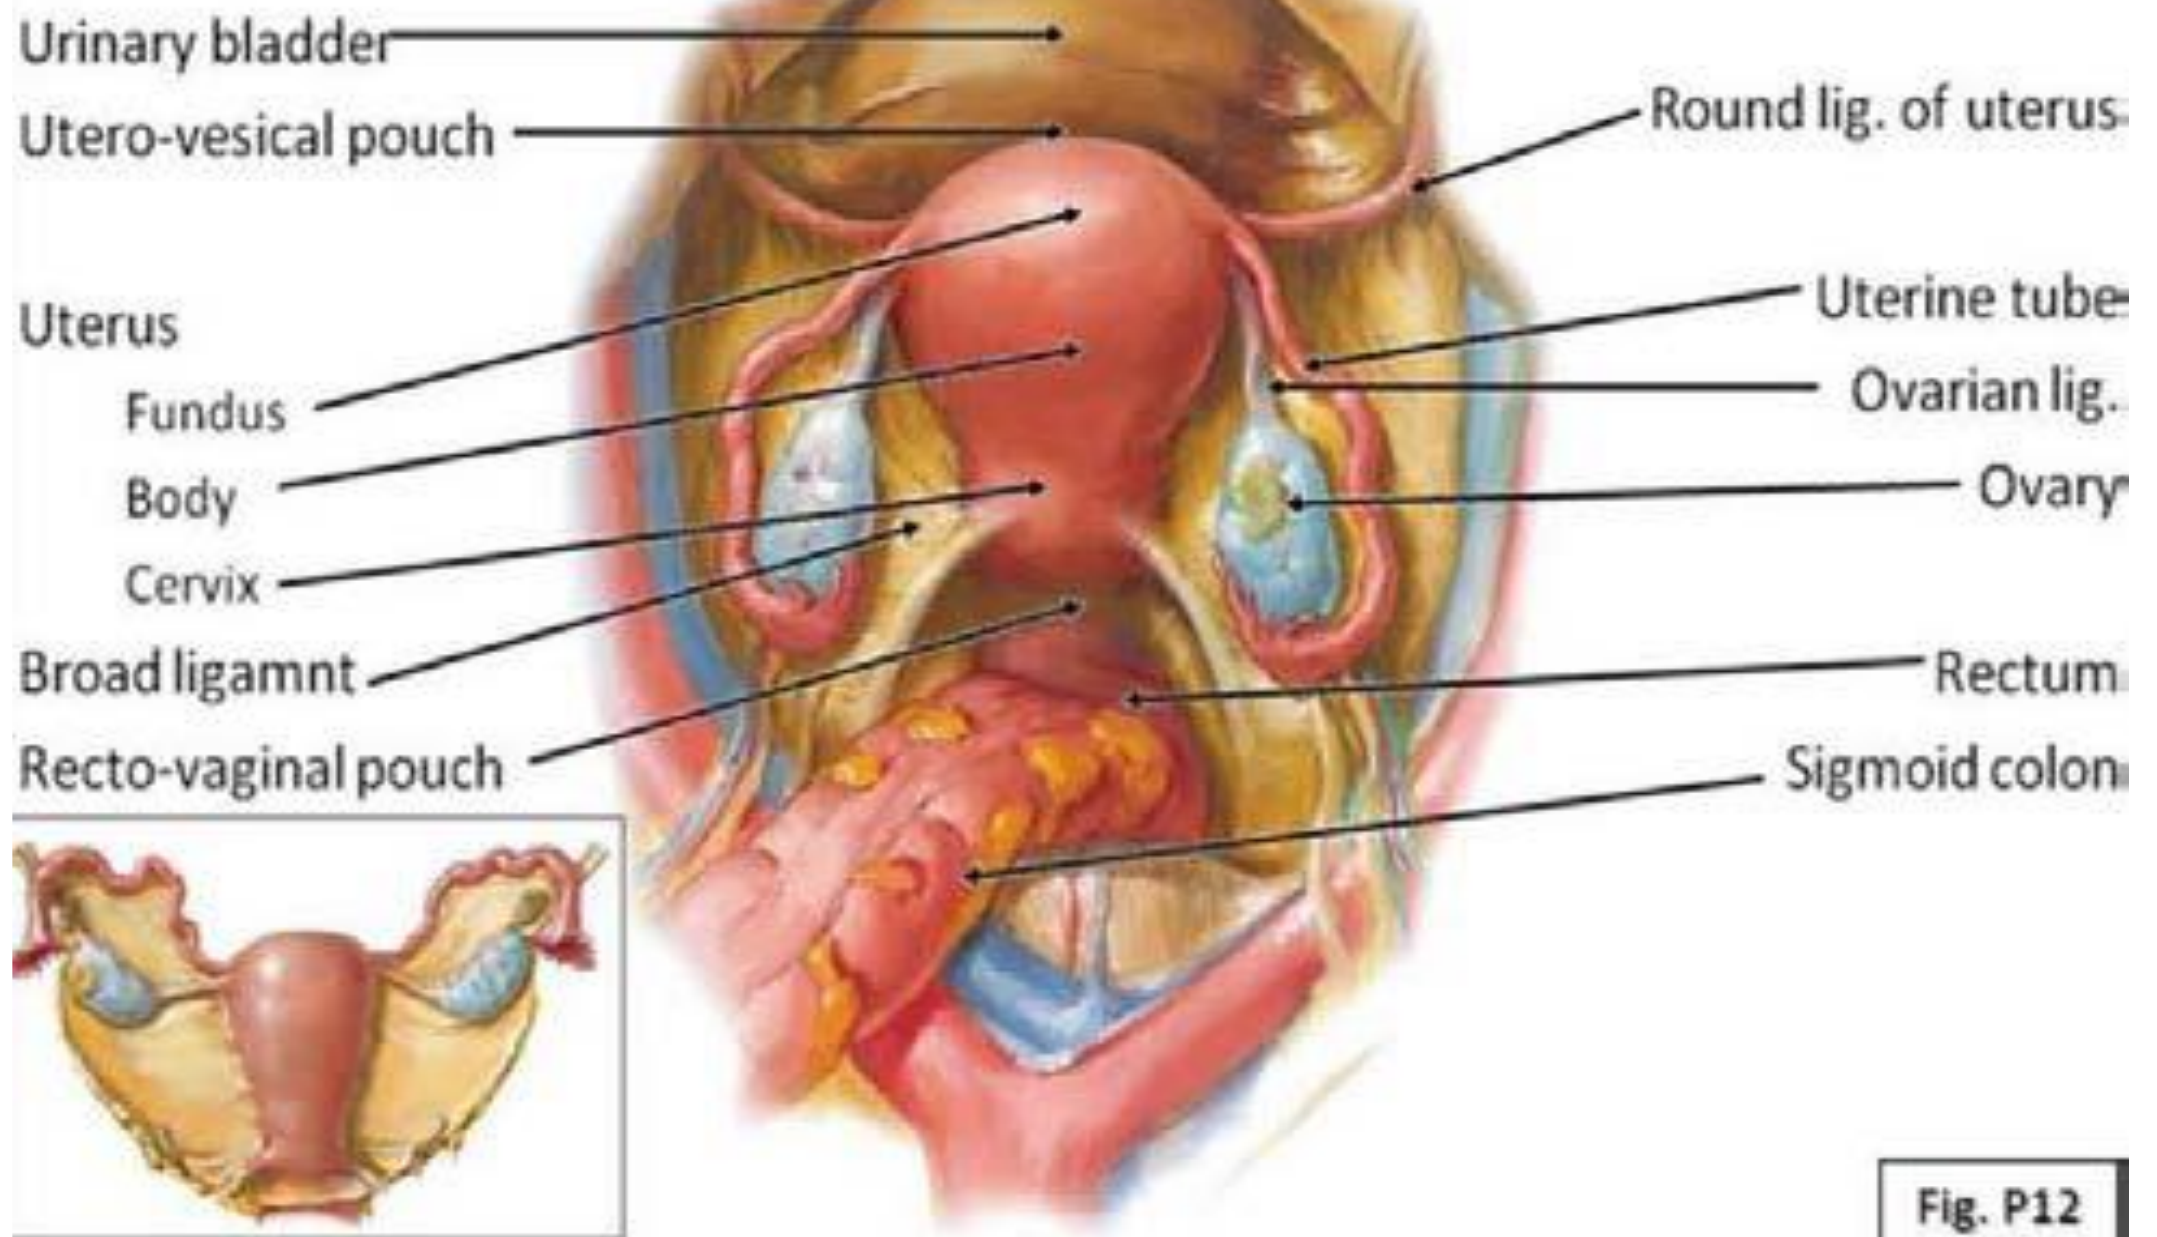

It includes

1. the **2 ovaries** which lie on the pelvis
2. The **uterine (Fallopian) tubes** extend from the uterus.
3. The **uterus** is a pear-shaped muscular organ it is made ***fundus, body and cervix***
4. The **vagina** is a muscular tube to the back of the urethra.

It opens in the **vestibule of vulva** by an opening that is closed by membrane (***the hymen***) in virgins.

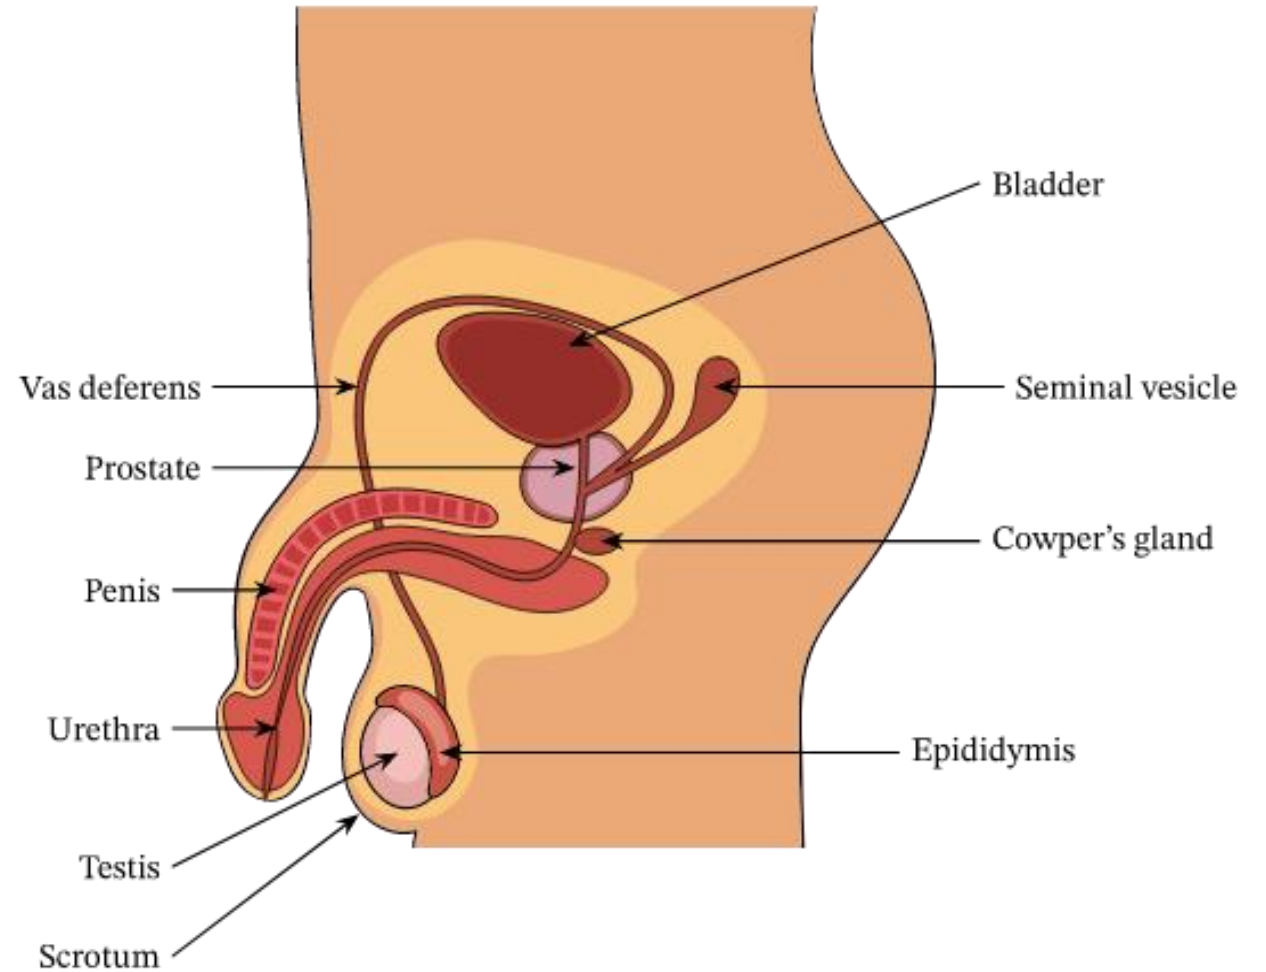

FEMALE REPRODUCTIVE SYSTEM

Male genital system

- 1.Scrotum
- 2.Testis +epididymis
- 3.Vas deference
- 4.Prostate gland
- 5.Seminal vesicles
- 6.Penis +urethra

Male genital system

1. Scrotum = contain testes
2. Testis = form sperms
3. Epididymis = store sperms
4. Vas deference = transfer sperms from **3-E** to prostatic urethra
5. Prostate gland = secret enzymes
6. Seminal vesicles = add glucose to semen
7. Penis = organ of sexual intercourse
8. **urethra = Allow passage of BOTH urine and semen**

Male genital system

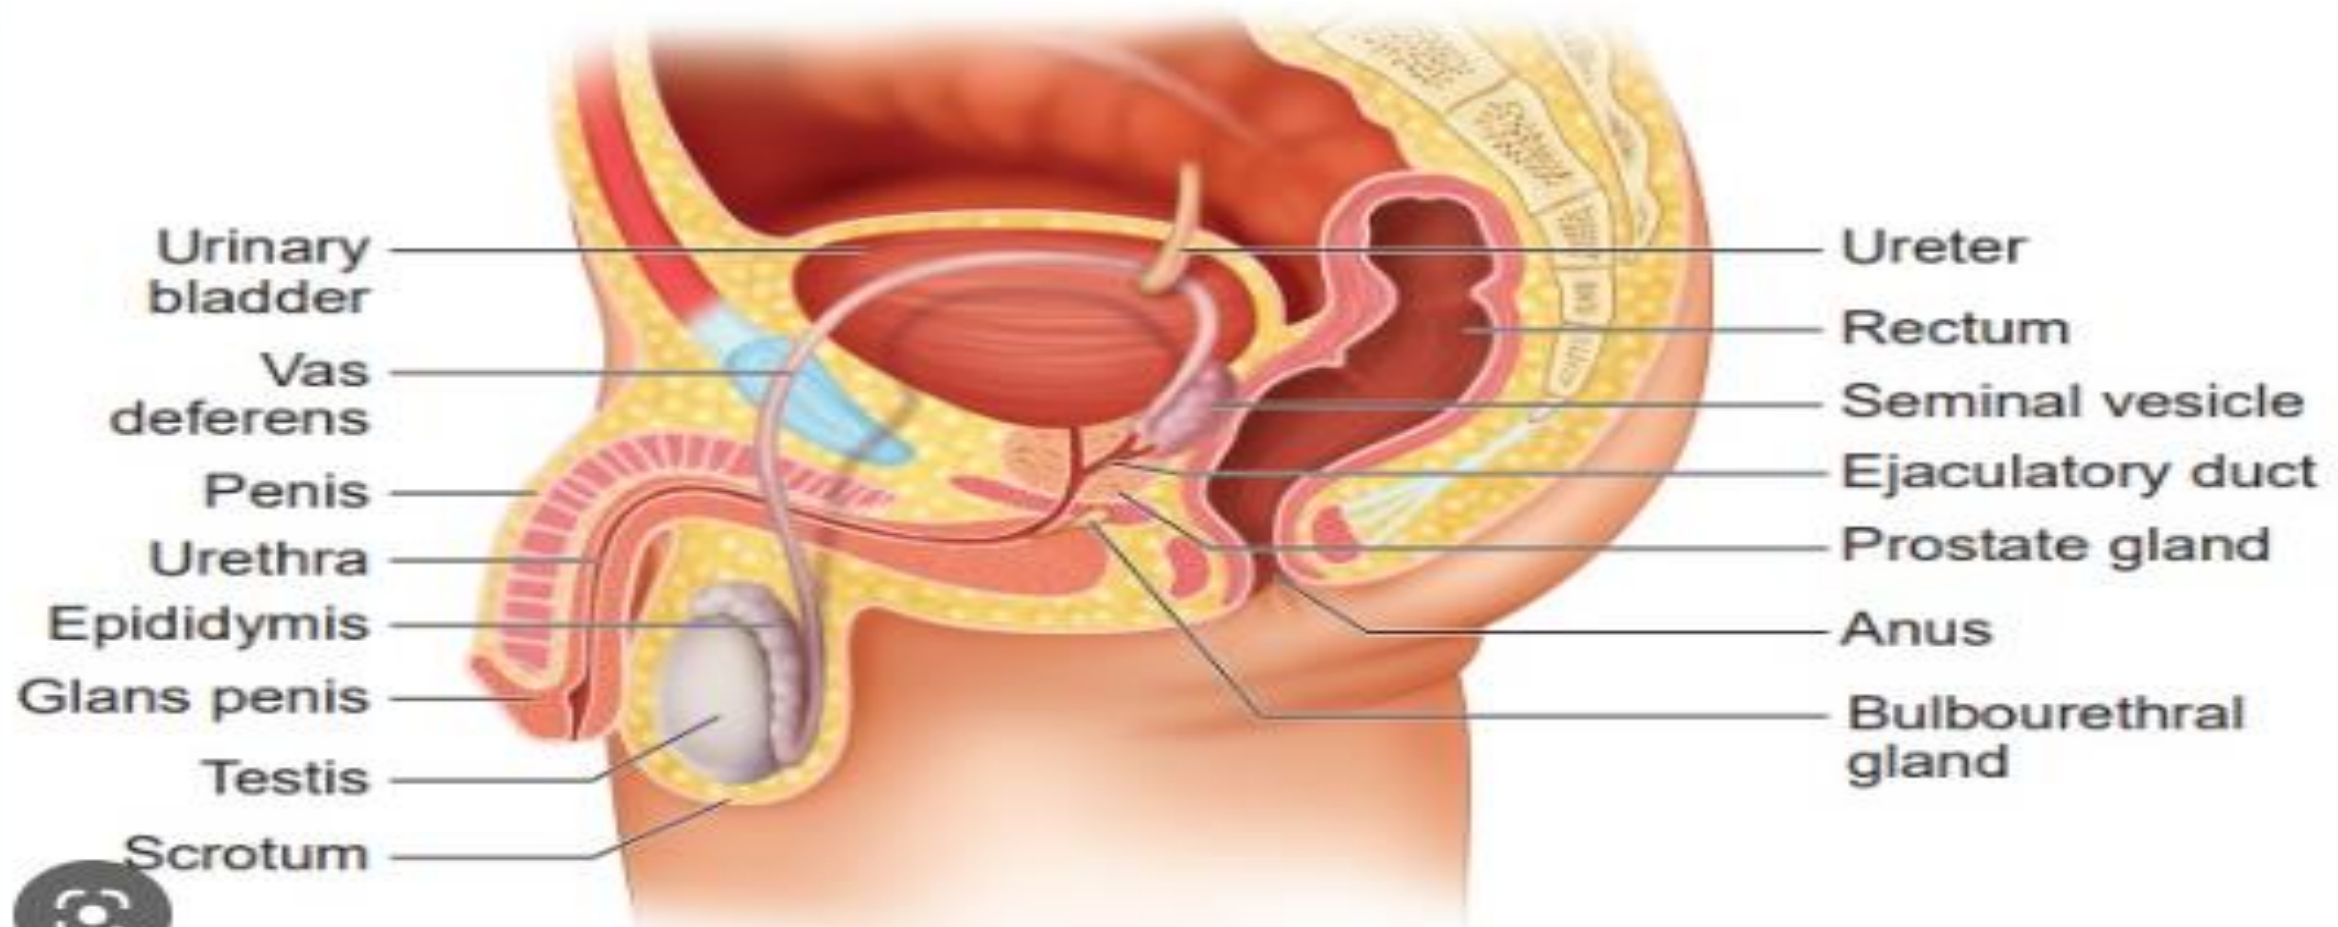

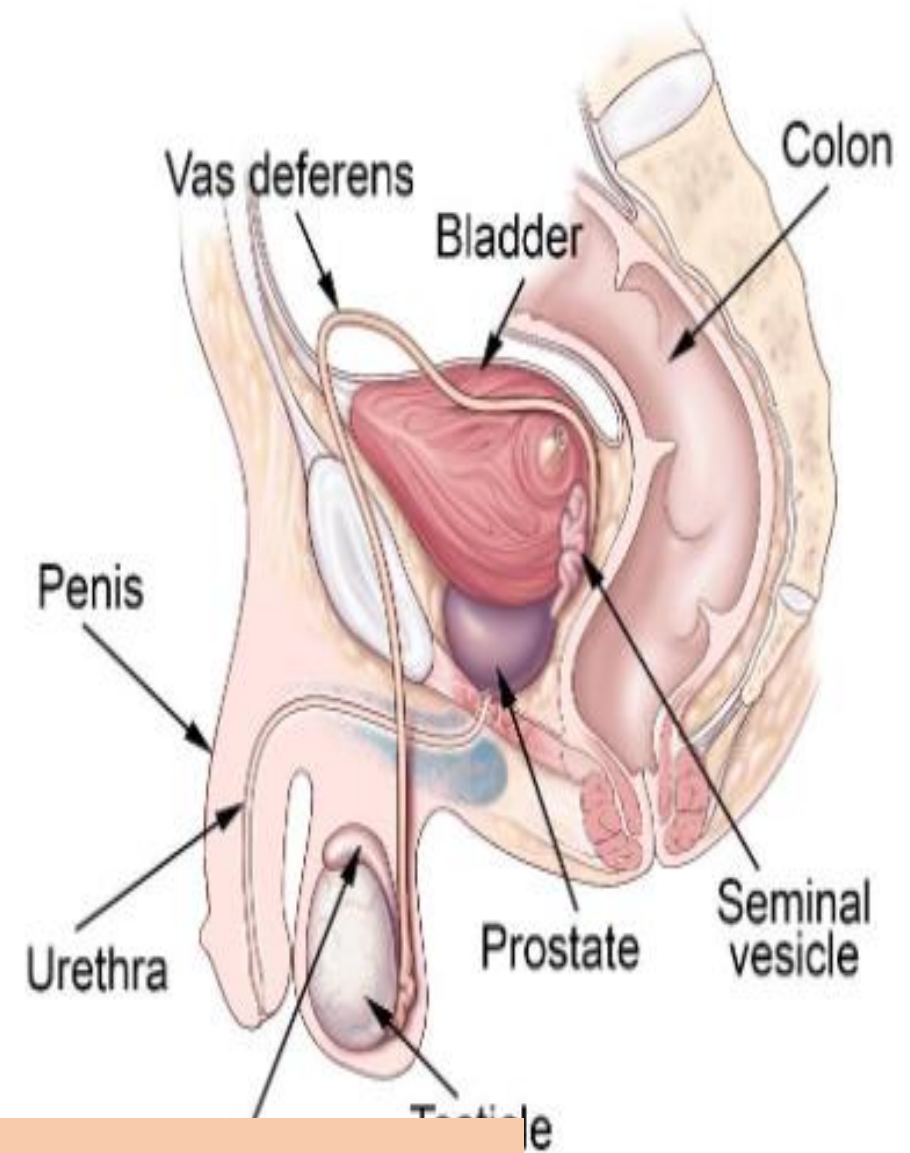

Fig. 2.1 Male reproductive system

Male genital system

The urinary bladder , its neck (inferiorly) rests on the base of the **pyramidal prostate gland** & gives the **urethra** which opens on the **tip of the glans** by the **external urethral meatus**

- Behind the base of the urinary bladder, lies the two **seminal vesicles** (laterally) and the 2 **vas deference** (medially).
- Each **vas** unites with **seminal vesicle** to form an **ejaculatory duct** that **pierces the base of prostate** to open on the back of the prostatic urethra.

vas + seminal vesicle = ejaculatory duct ----open on prostatic urethra.

Parts of the external genitalia in the male and female: (Fig. P14)

Male genitalia	Female genitalia
1. Penis: Glans – Body 2. Scrotum	1. Vulva: Labia majora – Labia minora 2. Vestibule of vagina & Clitoris

The Female External genital organs
