

MCQ (10 Questions)

1-Medical Technology is best described as:

- A) A branch of engineering only**
- B) A branch of healthcare science**
- C) A chemical analysis method only**
- D) A diagnostic tool without equipment**

2-The main role of medical technologists is to:

- A) Prescribe drugs**
- B) Perform surgeries**
- C) Analyze biological samples**
- D) Diagnose diseases without tests**

3-Which of the following is NOT included in medical technology fields?

- A) Microbiology**
- B) Genetics**
- C) Astronomy**
- D) Chemistry**

4-One of the course objectives is:

- A) Learning only theory**
- B) Ignoring research ethics**
- C) Planning research and working with data**
- D) Avoiding scientific communication**

5-Which of the following is a basic lab technique?

- A) Spectroscopy**
- B) Cooking**
- C) Painting**
- D) Writing**

6-Lab safety mainly aims to:

- A) Increase experiment cost**
- B) Protect people and equipment**
- C) Delay experiments**
- D) Reduce lab usage**

7-Which type of hazard is NOT mentioned in lab safety?

- A) Biological**
- B) Chemical**
- C) Electrical**
- D) Psychological**

8-One of the general lab safety rules is:

- A) Eat during experiments**
- B) Taste chemicals**
- C) Wash hands after experiments**
- D) Ignore accidents**

9-The primary goal of personal safety is to:

- A) Increase exposure**
- B) Minimize hazards**
- C) Ignore chemicals**
- D) Speed up work**

10-MSDS provides information about:

- A) Only chemical names**
- B) Hazards and safe handling**
- C) Lab attendance**
- D) Student grades**

Answers

1-B

2-C

3-C

4-C

5-A

6-B

7-D

8-C

9-B

10-B

True / False (10)

1. Medical technology helps in disease prevention.
2. Medical technologists only work with blood samples.
3. Lab safety includes personal, environmental, and reagent safety.
4. Eating in the lab is allowed if careful.
5. MSDS includes emergency information.
6. NFPA helps identify chemical hazards.
7. Blue color in NFPA indicates fire hazard.
8. Lab safety reduces contamination.
9. Pipettes can be used for different chemicals without cleaning.
10. Good ventilation is important in labs.

Answers

1- True

2- False

3- True

4- False

5- True

6- True

7- False

8- True

9- False

10- True

Complete

1. Medical technology is a branch of _____ science.
2. Medical technologists analyze _____, _____, and tissues.
3. Lab safety protects from _____, _____, and electrical hazards.
4. Never _____ or _____ chemicals.
5. Always wear _____ shoes in the lab.
6. Personal safety aims to minimize _____ to hazards.
7. Good _____ is essential for lab environment safety.
8. MSDS stands for Material Safety _____.
9. NFPA uses _____ coding system.
10. Red color in NFPA indicates _____ hazard.

Notes (10)

1. Define Medical Technology.
2. Explain the importance of medical technology in healthcare.
3. Mention basic laboratory techniques used in medical technology.
4. Define lab safety.
5. Explain why lab safety is important.
6. List general lab safety rules.
7. Describe personal safety in the laboratory.

- 8. Explain MSDS and its importance.**
- 9. Explain NFPA system and color coding**
